

Instructions

How to Use ToolLodge®

Note: Indentations are permanent. Finalize the layout before impressing tools.

2 Layout

- Place ToolLodge® on a smooth and sturdy work surface
- Gently place tools as you see fit
- Avoid dropping tools on the organizer as they may dent the surface

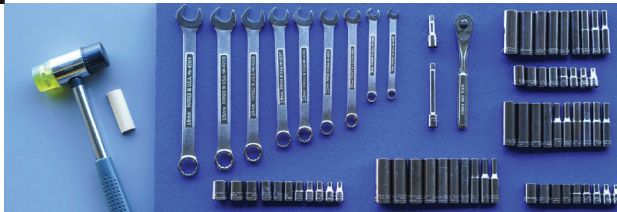

4 Grip Tool

- Use the included grip tool to make small, adjacent indentations for easier access to tools

1 Fit Check

- Place the ToolLodge® organizer in the empty tool drawer to check the initial fit
- ToolLodge® should fit loosely. Remove/extend the drawer as needed

3 Impressions

- Press each tool into place by applying pressure to make permanent impressions
- Use a hammer to make deeper impressions to hold the tool
- Larger tools may require pressing/tapping one end of the tool at a time
